(54) Title: UTILIZATION METHOD AND SYSTEM WITHIN A COMMUNICATION NETWORK

(57) Abstract: The present invention relates to a utilization method and system within a communication network comprising at least one service provider (36; 38) and at least one service consumer (32). In particular, the invention relates to a license contract validation method and system for web services during runtime. At least one parameter (CEP, CFP) is provided to define, if and how many meter event requests associated with service requests may be stored in a cache memory (70). The parameter (CEP, CFP) is predefined and may be contained in the license contract, for example. Further, a counter may be provided for counting the service requests. The actual status of the counter is sent to the service consumer (32) and/or the service provider (36; 38).

(84) **Designated States** (*unless otherwise indicated, for every kind of regional protection available*): ARIPO (BW, GH, GM, KE, LS, MW, MZ, NA, SD, SL, SZ, TZ, UG, ZM, ZW), Eurasian (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IS, IT, LT, LU, MC, NL, PL, PT, RO, SE, SI, SK, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
